

# VISURE FOR IBM DOORS MIGRATION

IBM DOORS imposes a way of working which is not the adequate for the new market challenges. It prevents companies from adopting new techniques, methods and capabilities to streamline the requirements processes and increase teams effectiveness.

Visure Solutions provides the easiest, only automated and most complete migration from IBM DOORS in the market, so you can start building better products, quicker and more efficiently than ever before with Visure Requirements.

## SIMPLE COMPLETE AND AUTOMATED MIGRATION

Migrate complete DOORS projects (including history and baselines over time) from the aged and expensive platform to Visure Requirements in a safe and easy way.

The migration tool has been designed by proven DOORS and DXL experts which assures you not only that data is migrated with the best possible mapping, but that also that the migrated structures makes perfect sense to a DOORS user. And it is cost-free!

## WHAT ARE THE BENEFITS FOR MOVING AWAY?

### SAVE MONEY

Running and maintaining DOORS involves a huge investment on both Support & Maintenance fees and personnel for administration and customisation.

Basic features plus additional like graphical modeling of the requirements process, workflow support, metrics, document generation and others come built-in in Visure Requirements and don't need expensive customisation.

### LOW RISK ADOPTION. FAMILIAR ENVIRONMENT TO DOORS USERS.

Save money, time, and user pain since users will enjoy working with their data from DOORS in familiar structures but in a much more advanced environment.

### COLLABORATIVE AND OPEN

All team members can work on the same set of requirements at the same time. Users are locking only those individual requirements they are editing and not a complete requirements document.

Besides, Visure Requirements has an open architecture and relies on proven and scalable databases. And it allows you to build your perfect suite since it already integrates with a lot of powerful tools.

**OUR PROFESSIONAL SERVICES SUPPORT YOUR MIGRATION PROCESS**

Through the Professional Services DOORS Migration Pack, the team will work with you on defining your route to Visure Requirements based on your needs, expectations and project goals.

- If you want to use the opportunity to clean up the DOORS data before migration, we can provide consulting services for a DOORS health-check and advise you on how to prepare for your migration, so that you focus your migration effort on data that actually needs to be migrated.
- We can help you coordinate the migration of your entire DOORS database or individual projects.
- We can deliver specific Visure Requirements training for DOORS users.
- We can also customize the migration process and tool for different mappings to meet your specific needs.
